

SUPRA™ GT

LEAVE THE COMPETITION IN THE DUST

LIGHT OIL

Introducing the Supra GT, the latest evolution in the dynamic Supra lineage! A high-octane powerhouse, the Supra GT is specially engineered to take on the most challenging dry lane conditions with a blend of speed and precision that is simply unmatched. Building upon the base of the Supra Rally, this new addition is meticulously engineered to provide added traction and speed previously unseen!

QUADFIRE™ V2 WEIGHT BLOCK

Under the hood of the Supra GT you'll find the revolutionary Quadfire V2 core. This core boasts a high RG and a moderate Differential, the perfect balance of power and handling.
15# RG: 2.57 | 15# Diff: .040 | Flare: 4"+

PROPULSION™ XRT PEARL REACTIVE

The sleek, dynamic Propulsion XRT Pearl Reactive cover stock is a masterpiece of design. This new cover formulation functions like slick tires on a race car. It offers minimal resistance as it sails through the front of the lane, but corners with explosive down-lane motion when it hits friction. When compared its predecessor, the Supra Rally, the cover from the Supra GT offers a boost of added traction and cornering speed.

5500 GRIT LSP FINISH

Featuring a mirror-like 5500 grit LSP finish, the Supra GT is fine tuned for added length and explosive angularity!
