

FEEL THE CHILL SUBZERO FORGE™

MEDIUM-HEAVY OIL

Introducing the ice-cold devastation of the new Subzero Forge. This latest beast in the Forge line is a force of nature, combining the proven power of the Detonator core with the icy grip of Leverage MXC Solid Reactive coverstock. The outcome is inevitable: pins left shattered and your competition frozen in fear. Embrace the cold and conquer the lanes with the Subzero Forge.

DETONATOR™ WEIGHT BLOCK

The Detonator core features a low RG to provide unparalleled control, with a high differential that delivers the strength needed to plow through the heaviest oil like a glacier carving its path.
15# RG: 2.47 | 15# Diff: .055 | Flare: 5"+

LEVERAGE™ MXC SOLID REACTIVE

Paired with this powerful core is the Leverage MXC Solid coverstock, enhanced with our Duramax™ additive. This isn't just another coverstock; it's an incredibly strong surface that maintains its texture longer than any solid before. You'll feel the ice-cold precision of the Evoke, but with an updated ferocity that true MOTIV enthusiasts will recognize as the successor to the Forge Flare!

2000 GRIT LSS FINISH

A 2000 grit LSS finish provides an icy bite to the cover to create tremendous amounts of traction on the lane, even on heavier oil conditions.
