

# PROPEL™ LINE

Introducing the new Propel line from MOTIV! This new performance line offers a fantastic entry level option for all skill levels. Featuring slightly more performance than a spare ball, the Propel line is perfect for bowlers who are looking for a weaker option than our Top Thrill or Ascend lines or are looking for their first performance ball at a lower price point.

### TYRO™ WEIGHT BLOCK

The Tyro core is a less dynamic core that thrives on conditions with lower oil volumes. A less dynamic core is necessary to provide enough length and a consistent reaction in these harsh environments.

15# RG: 2.75 | 15# Diff: .028 | Flare: 2"+

### FOUNDATION URETHANE

A true pearl urethane coverstock, this new cover option provides a consistent reaction on dry lane conditions. This cover is ideal on extremely dry conditions or for bowlers with higher revs and/or slower ball speed.
