TANK™ YELLOWJACKET

LIGHT OIL

Introducing the Tank Yellowjacket, the ultimate choice for dominating challenging environments. The Tank line is already known for its exceptional control, but the Yellowjacket Tour Edition takes it to the next level with a microcell polymer (MCP) coverstock featuring MOTIV's new Duramax™ additive. This innovative technology gives you a strong urethane-like shape while being adaptive to finish adjustments.

FLUX™ WEIGHT BLOCK

To achieve the desired ball motion, we've carefully selected the Flux core - the ultra-high RG and low differential core that minimizes down-lane motion.

15# RG: 2.57 | 15# Diff: .015 | Flare: 2"+

FRIXION™ M5 SOLID MICROCELL POLYMER

Featuring Frixion™ Mark 5 Solid MCP coverstock, the Tank Yellowjacket is set apart because it utilizes new Duramax™ technology. It allows the ball to resist lane-shine and hold the finish profile longer. This is especially important on aggressively sanded bowling balls like this one. Yet, unlike other balls in this performance class, the Tank Yellowjacket is also easily tunable for high friction environments that require a higher finish with more energy retention.

1000 GRIT LSS FINISH

A 1000 grit LSS finish provides an incredible amount of cover traction to give you the control you need to excel on challenging conditions.
