EJ Tackett, who loves both the Max Thrill Solid and Pearl, said, "As much as I use the Max Thrills, I see a gap between the Pearl and the Solid that I really want to see filled". That's why we created the Max Thrill Hybrid, designed to fill that sweetspot. After trying it out, EJ commented, "This ball is going to be great for me as a step down from my Venom Shock. I can't wait to add it to my bag." Level up YOUR game with the new Max Thrill Hybrid.
