

WE'RE ON A QUEST

MEDIUM-HEAVY OIL

The Trident Quest™ is the culmination of extensive cover stock research conducted to create a violent and angular response to friction. Perfectly tuned for medium-heavy oil conditions, the asymmetric pearl Trident Quest is a remarkably aggressive ball.

HEXION™ REACTIVE

Hexion™ Reactive cover stock technology sets this ball apart. This fast response, skid-flip shell slips easily through the front of the lane to deliver an incredibly violent backend snap.

HEXION™

TURBULENT™ WEIGHT BLOCK

The Turbulent™ weight block at the center of the Trident Quest™ demonstrates impressive agility at the backend of the lane.

5000 GRIT LSP FINISH

The Trident Quest is tuned at the factory for medium-heavy oil with a 5000 Grit LSP finish, but the dark purple and blue pearl cover can easily be scuffed to provide traction in heavier volumes of oil.
