

STRIKE WITH A VENGEANCE

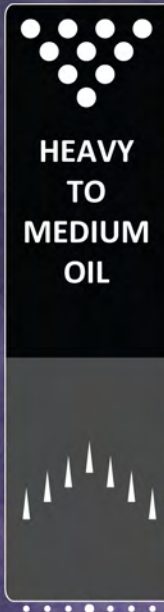

The new pearl RAPTOR ATTACK™ strikes with a vengeance. It is the first asymmetric pearl ball ever released by MOTIV™. Utilizing Atomix™ SFP Reactive cover technology, the Raptor Attack is very long and clean down the lane with a quick response to friction on the backend.

On sport shots, it dominates when heavy oil patterns break down and transition. On the THS, bowlers with moderate to high rev rates will be able to swing the ball with confidence, seeing an impressive backend move as the Raptor Attack sinks its talons into the lane.
