

LOCKED AND LOADED

LIGHT OIL

One of the longest running MOTIV® product lines, the Tanks are the premiere bowling balls for control on the harshest conditions. The latest addition to this legendary line is the Purple Tank™. The Purple Tank™ displays incredible control along with the aggressive traction seen from previous MCP balls like the Tank™ Blitz, and is ready to dominate when true urethane is needed in battle.

PURPLE SOLID URETHANE

MOTIV® is unveiling the brand new Purple Solid Urethane cover stock. It builds on the technology of Microcell Polymer, but it eliminates the oil absorption that causes MCP covers to shape down lane.

FLUX™ WEIGHT BLOCK

To boost the control factor, the Flux™ core is employed on the Purple Tank™ to lower the track flare potential. The Flux™ core is the proven solution for wet/dry conditions when the bowler needs to use shallow angles.

1000 GRIT LSS FINISH

The aggressive 1000 Grit LSS finish provides traction in the mid-lane with the control down-lane that only urethane can provide.
