

# TAKE CONTROL

## LIGHT OIL

The pearl Desert Tank™ is yet another incredible ball featuring new Microcell Polymer technology, which provides the motion of urethane with the continuation of reactive resin. The cover, core, and finish all come together on the Desert Tank™ to provide a weapon that is dialed in for a controllable motion on high friction lane conditions. Speed-dominant bowlers will really appreciate the performance attributes of this release.

## FRIXION+™ PEARL MICROCELL POLYMER

Featuring a pearl version of the Frixion+ Microcell Polymer cover stock used on the Tank Blitz, the Desert Tank™ maneuvers powerfully in lighter oil volumes.

## FLUX™ WEIGHT BLOCK

To help provide an even smoother motion than the Covert Tank™, the low differential Flux™ core design has been deployed to tame track flare.

15# RG: 2.57

15# Diff: .015

Flare: 2"+

## 2000 GRIT LSS FINISH

The 2000 Grit LSS finish is tuned to provide a smooth and controllable ball motion in high friction environments.
