MEDIUM-HEAVY OIL

The Forge™ Flare brings the heat with solid reactive technology unlike anything ever seen before in the MOTIV® Bowling line! Designed for use on medium-heavy oil conditions, it provides unparalleled traction in the front of the lane, without sacrificing down lane reaction. Bowlers will find they are able to easily shape this ball and play deeper in the oil than ever before with a symmetrical ball.

COERCION™ MXC SOLID REACTIVE

New Coercion™ MXC (MaXimum Continuation) Solid Reactive cover stock is the strongest solid shell ever created by MOTIV®. Most impressive is the continuation from such a strong cover.

DETONATOR™ WEIGHT BLOCK

The symmetric Detonator™ core features a low RG and high Diff for an incredibly fast revving, strong, and continuous motion.

15# RG: 2.47

15# Diff: .055

Flare: 5"+

2000 GRIT LSS FINISH

The 2000 Grit LSS finish provides plenty of traction in the oil to create added hook and control.
