

PREPARE FOR COMBAT

LIGHT OIL

The Combat Tank™ is a unique weapon featuring a hybrid Alchemy™ cover and the Recon™ weight block, which have never been used before to drive a MOTIV® ball. This combination is clean through the fronts with a faster response to friction on light oil conditions.

HEXION™ HYBRID REACTIVE

One of the rarest compositions in the history of bowling, Alchemy™ Hybrid is a unique urethane that gives the Combat Tank a motion many bowlers will appreciate. The Alchemy™ Hybrid cover offers easier length and greater continuation without sacrificing that silky smooth urethane motion.

RECON™ WEIGHT BLOCK

The Recon weight block provides a higher RG and more differential than the Gear V2 used in the Tank Rampage. The benefit is slightly more length with more down lane continuation.

15# RG: 2.59

15# Diff: .025

Flare: 2"+

3000 GRIT LSS FINISH

While the Combat Tank features a box finish of 3000 Grit LSS to compliment the hybrid technology, surface adjustments will make a huge difference in performance.
